**Suggested Installation Instructions for:**  
**614-876, 618-767, 619-055, 619-065, 628-673, 638-170, 638-572, 638-607**  
**Corvette Third Brake Light**

**Count on Mid America Motorworks for all your Corvette Parts and Corvette Accessories**

**TOOLS REQUIRED:**

10mm Socket & Wrench  
 15mm Torx-Bit with Driver

1. Using the Torx Driver, remove the two inner tail-lamps from both sides of the Third Brake Light. One screw holds each light to the fascia.
2. Remove (4) 10mm nuts that secure the Third Brake Light to the fascia. You can access two nuts from each opening on either side of the Third Brake Light.
3. To unplug the electrical connector from the Third Brake Light, lift up on the tab and unseat the connector.
4. Gently lift the Third Brake Light off of the fascia.
5. Repeat steps 3 through 1 to install the Third Brake Light.
