	5. FIRE & EXPLOSION	HAZARDS				
5.1	Flashpoint & Method: 218 °C (> 425 °F)					
5.2	Autoignition Temperature:					
5.3	Flammability Limits: Lower Explosive Limit (LEL): NA Upper Explosive I	Limit (UEL): NA				
5.4	Fire & Explosion Hazards: This material can burn but will not readily ignite. This material will release vapors when heated above the flash point temperature that can ignite when exposed to a source of ignition. In enclosed spaces, heated vapor can ignite with explosive force. Mists or sprays may burn at temperatures below the flash point. Carbon dioxide, carbon monoxide, smoke, fumes, unburned hydrocarbons and trace oxides of sulfur, phosphorus, zinc and nitrogen. Also, depending upon the conditions of use, low concentrations of					
5.5	hydrogen sulfide can be released. Extinguishing Methods:			_		
5.6	Dry chemical, foam, carbon dioxide, and water fog.					
0.0	Firefighting Procedures:         Keep containers:         Keep containers cool until well after the fire is out. Use water spray to cool fire-exposed surfaces and to protect personal. Avoid spraying water directly into storage containers because of danger of boilover.         Prevent runoff from fire control or dilution from entering sewers, drains, drinking water supply, or any natural waterway. Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.					
	6. SPILLS & LEAKS					
6.1	Spills: Secure spill area, remove or minimize all sources of ignition, and maxim Deny entry to all unprotected individuals. Individuals involved in the clear Recover free liquid or cover with inert absorbent material and place into or cover with dry earth, sand, or other inert non-combustible absorbent Contain large spills to maximize product recovery or disposal. If necessa sewers or any natural waterway or drinking supply. Contact appropria reporting requirements. For water spills, remove from surface by skim provincial environmental agencies, sinking and/or suitable dispersants disposal of recovered material. Ensure disposal on compliance with gov regulations. Notify the appropriate federal & provincial authorities imm remedy the adverse effects of the spill.	anup must wear appropriate co material and p ary, dike well a te local and/o ming or with so may be used vernment requir	r appropria ntainer(s) fo place into w head of the r provincial witable abs in unconfin ements & so	te personal pr or disposal. 	7. STORAGE & HANDLING					
7.1	Work & Hugiono Practicos					
7.1	Work & Hygiene Practices: Use normal hygiene practices. Avoid breathing vapors. Avoid direct skin contact. Wash hands thoroughly after using this product and before eating, drinking, or smoking.					
7.2	Storage & Handling: Use and store in a cool, dry, well-ventilated area. Keep away from excessive heat, open flames, sparks, and other possible sources of ignition. Do not store in unmarked containers or storage devices.					
7.3	Special Precautions: Empty containers may contain product residue. Do not pressurize, cut, heat or weld empty containers. Do not reuse empty containers without commercial cleaning or reconditioning.					
		8. EXPOSURE CONTROL & PERSONAL PROTECTION				
0.1						
8.1	occupational expo or is agitated.	controis: anical dilution ventilation is recommended to maintain airborne concentrations below the recommended sure limits, whenever this material is used in a confined space, is heated above normal temperatures (up to 38°C)				
8.2	under normal use exposure levels are	sting is not expected at ambient temperatures. Therefore, the need for respiratory protection is not anticipated conditions and with adequate ventilation. If elevated airborne concentrations above applicable workplace e anticipated, a NIOSH-approved organic vapor respirator equipped with a dust/mist prefilter should be used. vary depending upon the type of respirator used. Respirators should be used in accordance with OSHA FR 1910.134).				
8.3		ipped with side shields should be adequate protection under most conditions of use. Wear goggles and/or face or spraying is anticipated. Wear goggles and face shield if material is heated above 125°F (51°C). Have suitable ailable.				
8.4	Hand Protection: Use gloves constructed of chemical resistant materials such as neoprene or heavy nitrile rubber if frequent or prolonged contact is expected. Use heat-protective gloves when handling product at elevated temperatures.					
8.5	<ul> <li>Body Protection:</li> <li>Avoid prolonged and/or repeated skin contact. Use clean and impervious protective clothing (e.g., neoprene or Tyvek®) if splashing or spraying conditions are present. Protective clothing should include long-sleeves, apron, boots and additional facial protection. Remove oil contaminated clothing. Launder oil contaminated clothing before reusing. Contaminated leather goods should be removed promptly and discarded.</li> </ul>					
		9. PHYSICAL & CHEMICAL PROPERTIES				
9.1	Density:	0.91 g/cm³ @ 15°C				
9.2	Boiling Point:	ND				
9.3	Melting Point:	ND				
9.4	Evaporation Rate:	1.0 (n-butyl acetate = 1.0)				
9.5	Vapor Pressure @ 20°C:	ND				
9.6	Molecular Weight:	NA				
9.7	Appearance & Colour:	Brown Oily Liquid				
9.8	Odour Threshold:	Mild Petroleum Odor

9.12	Coefficient Oil/Water					
0.10	Distribution:	ND				
9.13	Additional Information:	NA				
	10. STABILITY & REACTIVITY					
10.1	Stability: Stable under norma	al conditions.				
10.2	Decomposition Products:	bon monoxide, metal oxides, and trace hydrocarbons.				
10.3	Polymerization: Will not occur.					
10.4	Conditions to Avoid:	s, high heat, and close proximity to incompatible substances.				
10.5	Incompatible Substances Strong oxidizing ag					

Mid America Motorworks, 17082 N. US Hwy 45, P.O. Box 1368, Effingham, IL 62401

Prep	Prepared to OSHA, ACC, ANSI, NOHSC, WHMIS & 2001/58 EC Standards MSDS Revision: 2.0 MSDS Revision Date: 01/01/2008					
	11. TOXICOLOGICAL INFORMATION					
11.1	Toxicity Data: Based on animal testing from similar materials & products, the acute toxicity of this product is expected to be: Petroleum Oils - LD <sub>50</sub> (oral, rat) > 5000 mg/kg; LD <sub>50</sub> (dermal, rabbit) > 2000 mg/kg; LD <sub>50</sub> (inhalation, rat) > 5000 mg/m <sup>3</sup> .					
11.2	Acute Toxicity:	- And the second state of				
	Mineral oil mists derived from highly refined oils are reported to have low acute and sub-acute toxicities in animals. Effects from single and short-term repeated exposures to high concentrations of mineral oil mists well above applicable workplace exposure levels include lung inflammatory reaction, lipoid granuloma formation and lipoid pneumonia. In acute and sub-acute studies involving exposures to lower concentrations of mineral oil mists at or near current work place exposure levels produced no significant toxicological effects.					
11.3	Chronic Toxicity:					
11.4	In long term studies Suspected Carcinogen:	s (up to two years) no carcinogenic effects have be	een reported in any animal	species tested.		
11.4	No.					
11.5	Reproductive Toxicity:					
	Mutagenicity:	This product is not expected to cause mutagenic	effects in humans.			
	Embryotoxicity:	This product is not expected to cause embryotox				
	Teratogenicity:	This product is not expected to cause teratogenic	c effects in humans.			
	Reproductive Toxicity:	This product is not expected to cause reproductiv	ve harm in humans.			
11.6	Irritancy of Product:	NA				
11.7	Biological Exposure Indices:	NA				
11.8	Medical Recommendations: The viscosity range of the product(s) represented by this MSDS is between 100-400 SUS at 100°F. Accordingly, upon ingestion there is a low risk of aspiration. Careful gastric lavage or emesis may be considered to evacuate large quantities of material. Subcutaneous or intramuscular injection requires prompt surgical debridement.					
		12. ECOLOGICAL IN	IFORMATION			
12.1	Environmental Stability:					
	Analysis for ecological effects has not been conducted on this product. However, if spilled, this product and any contaminated soil or water may be harmful to human, animal, and aquatic life. Also, the coating action associated with petroleum and petroleum products can be harmful or fatal to aquatic life and waterfowl.					
12.2	Effect on Plants & Animals: An environmental fate analysis has not been conducted on this specific product. However, plants and animals may experience					
12.3	harmful or fatal effects when coated with petroleum-based products. Effect on Aquatic Life:					
	Petroleum-based (mineral) lube oils will normally float on water. In stagnant or slow-flowing waterways, an oil layer can cover a large surface area. As a result, this oil layer might limit or eliminate natural atmospheric oxygen transport into the water. With time, if not removed, oxygen depletion in the waterway can result in a loss of marine life or create an anaerobic environment. This material contains phosphorus which is a controlled element for disposal in effluent waters in most sections of North America. Phosphorus is known to enhance the formation of algae. Severe algae growth can reduce oxygen content in the water possibly below levels necessary to support marine life.					
	13. DISPOSAL CONSIDERATIONS					
13.1	Waste Disposal: Dispose of in accordance with federal & provincial hazardous waste laws.					
13.2	3.2 Special Considerations: If the material is unsuitable for recycling or reclamation, enclosed-controlled incineration is recommended unless otherwise prohibited by local ordinance.

15.1	SARA Reporting Requirements:
	This product does not contains any substances subject to SARA reporting requirements.
15.2	SARA Threshold Planning Quantity:
	NA
15.3	TSCA Inventory Status:
	The components of this product are listed on the TSCA inventory.
15.4	CERCLA Reportable Quantity (RQ):
	NA
15.5	Other Federal Requirements:
	NA
15.6	Other Canadian Regulations
	All chemical substances of this product are listed on the CEPA DSL/NDSL or are exempt from list $(  au )$
	requirements. This product has been classified according to the hazard criteria of the CPR and
	the MSDS contains all of the information required by the CPR.
15.7	State Regulatory Information:
	New Jersey Worker & Community Right to Know Act, N.J.A.C. 8:59-5 Labeling Information: Gear Oil
15.8	67/548/EEC (European Union) Requirements:
	The primary components of this product are not listed in Annex I of EU Directive 67/548/EEC.
	16. OTHER INFORMATION
16.1	Other Information:
	This product has been classified according to the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains
	all of the information required by the CPR. The components of this product are listed on the DSL/NDSL. None of the components of
	this product are listed on the priorities substances list.
16.2	Terms & Definitions:
	Please see last page of this Material Safety Data Sheet.
16.3	Disclaimer:
	This Material Safety Data Sheet complies with Health Canada's Workplace Hazardous Materials Information System (WHMIS) & U.S.
	OSHA's Hazard Communication Standard, 29 CFR §1910.1200. To the best of ShipMate's or Lane Automotive's knowledge, the
	information contained herein is reliable and accurate as of this date; however, accuracy, suitability or completeness are not
	guaranteed and no warranties of any type, either expressed or implied, are provided. The information contained herein relates only to the specific product. Contact the manufacturer for additional information.

# **DEFINITION OF TERMS**

A large number of abbreviations and acronyms appear on a MSDS. Some of these that are commonly used include the following:

## **GENERAL INFORMATION:**

CAS No.	Chemical Abstract Service Number

# EXPOSURE LIMITS IN AIR:

ACGIH	American Conference on Governmental Industrial Hygienists
TLV	Threshold Limit Value
OSHA U.S. Occupational Safety and Health Administration	
PEL Permissible Exposure Limit	
IDLH Immediately Dangerous to Life and Health	

# FIRST AID MEASURES:

CPR	Cardiopulmonary resuscitation - method in which a person		
	whose heart has stopped receives manual chest		
	compressions and breathing to circulate blood and provide		
	oxygen to the body.		

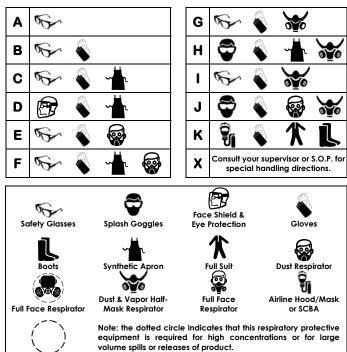

#### HAZARDOUS MATERIALS IDENTIFICATION SYSTEM: HMIS

# HEALTH, FLAMMABILITY & REACTIVITY RATINGS:

0	Minimal Hazard	[
1	Slight Hazard	
2	Moderate Hazard	
3 Severe Hazard		
4	Extreme Hazard	

### PERSONAL PROTECTION RATINGS:

# OTHER STANDARD ABBREVIATIONS:

NA	Not Available
NR	No Results
NE	Not Established
ND	Not Determined
ML	Maximum Limit
SCBA	Self-Contained Breathing Apparatus

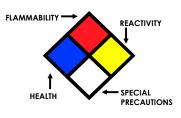

#### NATIONAL FIRE PROTECTION ASSOCIATION: NFPA

# FLAMMABILITY LIMITS IN AIR:

Autoignition Temperature	Minimum temperature required to initiate combustion in air with no other source of ignition
LEL	Lower Explosive Limit - lowest percent of vapor in air, by volume, that will explode or ignite in the presence of an ignition source
UEL	Upper Explosive Limit - highest percent of vapor in air, by volume, that will explode or ignite in the presence of an ignition source

# HAZARD RATINGS:

0	Minimal Hazard			
1	Slight Hazard			
2	Moderate Hazard			
3	Severe Hazard			
4	Extreme Hazard			
ACD	Acidic			
ALK	Alkaline			
COR	Corrosive			
<del>-W-</del>	Use No Water			
ОХ	Oxidizer			

#### TOXICOLOGICAL INFORMATION:

LD <sub>50</sub>	Lethal Dose (solids & liquids) which kills 50% of the exposed animals s					
LC <sub>50</sub>	Lethal concentration (gases) which kills 50% of the exposed animal					
ppm	Concentration expressed in parts of material pe million parts					
TD <sub>lo</sub>	Lowest dose to cause a symptom					
TCLo	Lowest concentration to cause a symptom					
TD <sub>Io</sub> , LD <sub>Io</sub> , & LD <sub>o</sub> Or	Lowest dose (or concentration) to cause lethal or					
TC, TC <sub>o</sub> , LC <sub>io</sub> , & LC <sub>o</sub>	toxic effects					
IARC	C International Agency for Research on Cancer					
NTP	NTP National Toxicology Program					
RTECS	S Registry of Toxic Effects of Chemical Substances					
BCF	BCF Bioconcentration Factor					
TLm	TL <sub>m</sub> Median threshold limit					
log Kow or log Koc	Coefficient of Oil/Water Distribution					

#### **REGULATORY INFORMATION:**

WHMIS	Canadian Workplace Hazardous Material Information System				
DOT	U.S. Department of Transportation				
TC	Transport Canada				
EPA	U.S. Environmental Protection Agency				
DSL	Canadian Domestic Substance List				
NDSL	Canadian Non-Domestic Substance List				
PSL	Canadian Priority Substances List				
TSCA	U.S. Toxic Substance Control Act				
EU	European Union (European Union Directive 67/548/EEC)
