

1960-1972 Radiator Date Coding Information.

To better assist you in selecting the correct date coding for your Corvette Radiator or Surge Tank for model years 1960-1972, the following information is sufficient to give you the correct answers.

The list of Corvette Production by Month for each production year will indicate the month your Corvette was built. Harrison Radiator used the “year/month” coding system on all parts and these parts usually pre-dated your Corvette’s build date by 1-3 months.

The following is the month coding used. Note the letter “I” is omitted.

- A =January
- B = February
- C = March
- D = April
- E = May
- F = June
- G = July
- H = August
- J = September
- K = October
- L = November
- M = December

As an example, if your 1967 Corvette’s serial number (VIN) is 194677S121024. This would indicate that your Corvette 21,024 was produced in June of 1967. A date code 1-2 months prior would be 67D or 67E.

All radiator and surge tanks used this “year/month” coding system, except for the late 1962 radiators.

The 11962 radiators produced after February reversed the coding stating with C62.

1960-1972 Radiators & Surge Tanks Date Coding
