

POLISHED HOT ROD SHOCKS

Shocks are the BRAINS of your suspension!

Nothing influences how your car rides and handles more than shocks absorbers. Straight axle equipped hot rods are in a realm of there own. They require a extremely short shock with specifically tuned compression and rebound dampening. When searching the rodder typically has to settle for harsh ride with a good looking shock or a OK ride with a horrible looking shock. And once they have settled they end up having to replace them after less than a year.

SETTLE NO MORE!

We now offer the only straight axle specific, mono-tube performance shock with a 1,000,001 mile warranty.

This would not be possible without the help of Roy Brizio Street Rods, Johnson's Hot Rod Shop, FOX Racing and many others in our industry.

More than just shiny!

All RideTech Polished Hot Rod Shocks are polished by the Ridler Award winning experts at Advanced Plating in Nashville, TN. Advanced is known around the world as being the best at Chrome Plating, and Polishing.

Features

- 1.) 1/2" hardened shaft is precision ground and straightened to a tolerance of .001" inch for increased durability and performance
- 2.) Billet end cap with integrated debris wiper to prevent seal damage
- 3.) Integral internal bumpstop eliminates extension crashing
- 4.) Teflon piston wiper allows consistent piston/bore contact and repeatable performance
- 5.) Specially contoured composite gas separator cup optimizes dead length and ensures proper nitrogen/oil separation
- 6.) Mono-tube design allows large piston for superior oil control increases ride quality and handling performance
- 7.) Oversized rod guide improves piston rod stability
- 8.) Mono-tube bore is cathode anodized for years of wear resistance
- 9.) Mono-tube design not only optimizes performance, but uses fewer components than a twin tube design. This is superior fluid control in its most simple and efficient form!

RideTech announces the 1,000,001 mile warranty!

As a reflection of the radical improvements in performance and durability that RideTech has implemented in their shock program over the last 3 years, all RideTech shocks sold after January 1, 2013 will carry a 1,000,001 mile warranty!

Why?

From RideTech president Bret Voelkel: "In partnering with the engineers at Fox, we've been able to see dramatic improvements in the handling performance, ride quality and durability of our entire shock line. At this point all RideTech shocks...ShockWaves, Coilovers, Struts and the new Q Series Smoothbody shocks use this new monotube platform. This 1,000,001 mile warranty is a demonstration of our confidence in this program."

Details

- All RideTech shocks sold after January 1, 2013 are included in the 1,000,001 mile warranty program.
- After your shock purchase from RideTech or a RideTech dealer you must register your purchase at www.ridetech.com/shockwarranty within 30 days
- If your RideTech fails to perform properly within the next 1,000,001 miles, RideTech will repair that shock free of charge. The only exclusion is obvious external damage [accident, abrasion, etc.]
- If you sell your car before the warranty expires, the warranty can be transferred to a new owner by going to www.ridetech.com/shockwarranty to register the new owner.
- Anyone who expires their RideTech 1,000,001 mile shock warranty will get a picture of themselves and their car in a fullpage ad in Hotrod Magazine!
