

Application: all models

Part Includes

1 - Safety Switch Battery Disconnect

Safety Switch Battery Disconnect

Tools Needed

STEP 1.

Read CAUTION! before installing switch.

STEP 2.

Remove key from the ignition

STEP 3.

Keep disconnect arm in "open" position until all connections are complete.

FOR MODEL #20108, 20109, 20168, 20208:

STEP 4.

Remove battery's top cable from the battery's top negative (-) battery post.

STEP 5.

Clean battery cable to the post on the switch. For #20208, reattach battery cable to the post on the receiver side of the disconnect.

FOR MODEL #20198:

STEP 4.

Remove Battery's cable from the negative (-) battery post or terminal.

STEP 5.

Clean battery post on terminal for a good electrical contact.

STEP 6.

Find a suitable location and install the disconnect switch. MAKE SURE THAT YOUR HOOD OR OTHER METAL OBJECTS WILL NOT CONTACT THE SWITCH.

STEP 7.

Connect a cable from the "pivot side" of the disconnect switch to chassisground.

STEP 8.

Connect a cable from the "receiver side" of the disconnect to the negative (-) battery terminal.
