

Vette Net Installation Instructions

- Pop your hatch
- Set the right and left brackets in place
- Close the hatch, it locks the brackets in place
- Insert the Vette Net into the brackets
- Tap the Vette Net gently to set in place
- Tighten the thumb screws on the brackets for your view preference
- To remove, just reverse the process. Note that the brackets must be removed prior to putting your convertible top up.

frequently asked questions

What is the Vette Net constructed of?

Vette Net is made from a light weight anodized aluminum frame with a new clear, smoke tinted, polycarbonate deflector inside the sturdy frame.

How can something that simple stop wind buffeting?

The Vette net does not stop the wind, it merely slows it down enough to correct the wind noise problem that plagues the Corvette.

How much wind and noise does the Vette Net control?

GM Tested Vette Net at about an 80% reduction with the side windows up and about a 50% reduction in wind and noise with the side windows down. Vette Net provides door to door coverage, unlike our competitors that only provide a between the seats coverage. Vette Net blocks more wind than any other wind restrictor on the market, guaranteed.

Does the Vette Net work best with the side windows up or down?

The Vette Net works best with the side windows up. This diverts the wind from around the windshield over the top of the car.

Can I see through the Vette Net?

Yes, better than before. Our New Polycarbonate Deflector is virtually invisible, with a light smoked tint to reduce any glare!

Does the Vette Net rattle or move around?

No. You'll almost forget it's there.

Will the Vette Net damage my car in any way?

Absolutely not! The mounting brackets have a protective foam surface.

Do I have to drill any holes or make any modifications to my car?

No. The Vette Net is completely removable.

Is the Vette Net adjustable?

Yes. A thumb screw on the bracket allows for vertical adjustment for your viewing preference, and it is also width adjustable if your fit is too tight or too loose. Vette Net is fit to GM Specification.

Does the Vette Net fit the Automatic and Manual Top Corvette Convertible?

Vette Net fits the automatic top and the manual top just the same. Please see our installation page for the variation.

Can I put the top up with the Vette Net in place?

No. The Vette Net, must be removed prior to raising the top.
