IMAGE 1.

"Stock Piece" shows the factory 609011 pulled from its location to show its shape.

IMAGE 2.

"Stock Piece Installed" Shows the 609011 installed.

IMAGE 3 & 4.

"Stock Piece Removed" shows the area as you would see it if you loosen the 3 knobs holding the Air Cleaner assembly together, just as you would do if replacing the air filter. Once the air cleaner assembly is loose, bend the first section of the shield up (Blue Line). Place it in the area just under the air filter box with that first section bent up (vertical) and the rest of the shield laying flat on the radiator shroud. The notches on the rear left and right are there to roughly center the shield between the raised rails of the radiator shroud. This will keep any water from splashing up from under the car onto the air filter cover. There you have it. Just replace the air filter assembly and you are done.
