Air Cooled VW Door Replacement Tech Tip

Although the **VW Beetle Door** shell itself is the same from 1968-1979, the inside panel is unique to the respective year groups of 1968-1970, 1971-1973 and 1974-1979. Applications from 1968-1973 will require the old armrest tang to be chiseled off and welded to the new door. Applications from 1971-1973 will require repositioning of the door latch mounting studs. This is a small concession considering that new doors are no longer made specifically for 1968-1973 models. **MAM**

Door Panel Sound
Deadener, 1/8"
Ensolite Material.
Item # 319-042

Door Panel
Vapor Barrier,
Does Both Sides.
Item # 314-042
