

# A Sound Decision:

## Enjoy Today's Radio Technology Without Forfeiting Yesterday's Style!

When your Volkswagen sound system is on its last leg, you have a few options for an upgrade. From a full restoration of your original radio, to a pairing of retro looks and modern technology, to all the benefits of today's looks and function, the possibilities are only limited by your desires!

### Radio Restoration

If your VW is a regular on the show circuit, you may want to consider a restoration of your [existing radio](#). Simply send your Air-Cooled VW 6V or 12V AM/FM radio to the experts. Your radio undergoes extensive quality assurance testing, repairs are made where necessary and your radio receives a 1 year warranty, returning to you with improved detail and enhanced operation.

### Yesterday's Looks, Today's Features

For the VW enthusiast who wants more than AM/FM sound, but doesn't want to sacrifice original looks, RetroSound has a variety of options available for any 12V system. Select your functionality and then choose a faceplate to match your VW's interior.

#### Retro-Classic Radio

- AM/FM Tuner with 30 Presets
- Front & Rear Mounted Auxiliary Inputs
- White LCD Display For A Modern Update
- 20 Watts x 4 Channels

#### Zuma Radio

- AM/FM Tuner with 30 Presets
- Wire Mounted USB Port
- Enhanced White or Green LCD Display
- Built-in, High Power Amplifier
- Old Fashioned Push Button Look
